International Conference on Movement and Nutrition in Health and Disease in Regensburg, Germany, June 12-14, 2015

The University of Regensburg and the International Movement and Nutrition Society will host the **International Conference on Movement and Nutrition in Health and Disease**. We are pleased to invite you to join us for this conference, scheduled for June 12-14, 2015 in Regensburg, Germany.

Physical activity and nutrition play an important role in long-term health and disease. The **International Conference on Movement and Nutrition in Health and Disease** will cover a wide range of topics appealing to the interests of clinicians, researchers, practitioners and experts from industry. It will provide you with ample opportunity to share and exchange knowledge and experience in regard to the **contribution of diet, nutrition, physical exercise and sport to a healthy lifestyle, unimpaired aging, and the prevention and management of chronic diseases** such as heart and cardiovascular disease, overweight and obesity, metabolic syndrome, diabetes, cancer, kidney disease, allergies, rheumatoid arthritis, osteoporosis, dementia, depression, and other neuropsychiatric disorders.

The conference venue is on the campus of the University of Regensburg in Bavaria. The almost 2000-year-old city of Regensburg with its magnificent Gothic cathedral is inscribed on the UNESCO World Heritage List. Regensburg is the best-preserved medieval city in Germany and boasts numerous attractions from the times when Regensburg was a fortress on the border of the Roman Empire and in the Middle Ages a flourishing and wealthy trading place in Central Europe. The city was later the seat of the Permanent Imperial Parliament where ambassadors from German and European royal courts established a varied cultural life.

Apart from discussing recent developments related to nutrition and physical activity in health and disease, you will be able to enjoy the charming atmosphere of Regensburg and taste Bavarian food alongside excellent beer.

We look forward to welcoming you to Regensburg next June.

Klaus W. Lange, *President (IMNS)*
University of Regensburg, Germany

Shigehiko Kanaya, *Vice President (IMNS)*
Nara Institute of Science and Technology, Japan
